**Method of inhibiting pathogenic bacteria and fungi growth and microbicidal composition**

Dear Sirs,

I am among other the beneficiary of the above mentioned Patent (Method of inhibiting pathogenic bacteria and fungi growth and microbicidal composition).

Hence we have problems in communication with our Polish attorney Mr. Ludwik Hudy I would like to ask you if you could inform me about the **status quo** of the patent procedure.

Has the validation in France been done in a proper way?

Does the validation still exist?

If not, may I pay the annual fees to restore the validation for your country?

Hence the time for the payment of year fees is now ending, I would appreciate very much your soon answer to my above mentioned facsimile or email address.

Thank you very much for your cooperation

Andrzej Remin
